Restaurant Handheld System provider TriniTEQ named an IBM Business Partner

The logo for TriniTEQ features the word "Trini" in a light blue, italicized sans-serif font, followed by "TEQ" in a bold, dark blue sans-serif font. The letter "Q" is stylized with a white outline and a blue arrow pointing upwards and to the right.

EMERYVILLE, CA– TriniTEQ, Inc. announced today that it has been selected as an IBM business partner for the food service and hospitality industry. Under this agreement, TriniTEQ will offer its customers IBM's SurePOS hardware and services with its WaiterPAD handheld ordering system.

WaiterPAD is a complete RF handheld ordering system designed for the specific needs of the restaurant and hospitality industry. First deployed in 2000, WaiterPAD is used by hundreds of restaurants, bars, cafes, theaters and sporting venues around the world. The combination of IBM hardware, TriniTEQ software and WaiterPAD provides a complete system that increases service delivery, reduces costs, enhances profitability and now includes the reliability and performance of IBM food service hardware and services.

"IBM is very excited about the handheld devices that TriniTEQ offers to the restaurant markets," said Chris Foster, Business Unit Executive, IBM Retail Store Solutions. "We feel that this extends greatly the capabilities of the SurePOS family of products from IBM, while also extending the security of getting a customer's credit card information without leaving their table. This is a great 'next step' in technology for this market."

TriniTEQ offers a complete restaurant system designed for table service restaurants and other hospitality venues that includes its WaiterPAD handheld system, WaiterPOS software, back office software; and deployment and support services.

"TriniTEQ has successful handheld system deployments around the world that include restaurant chains and large, high volume sites owned by celebrity chefs," said Scott Allan, CEO of TriniTEQ. "These businesses rely upon our handheld systems to increase table turns, capture more spend per diner, improve service and lower costs. Now our customers benefit from the reliability and value of IBM hardware and support."
